

Build a Bridge Project

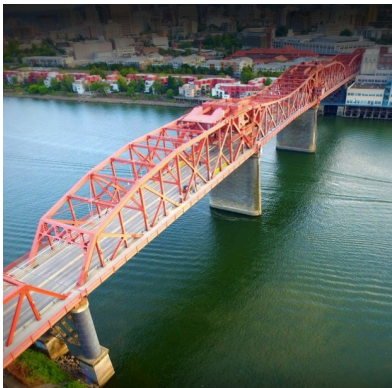

Steel Bridge

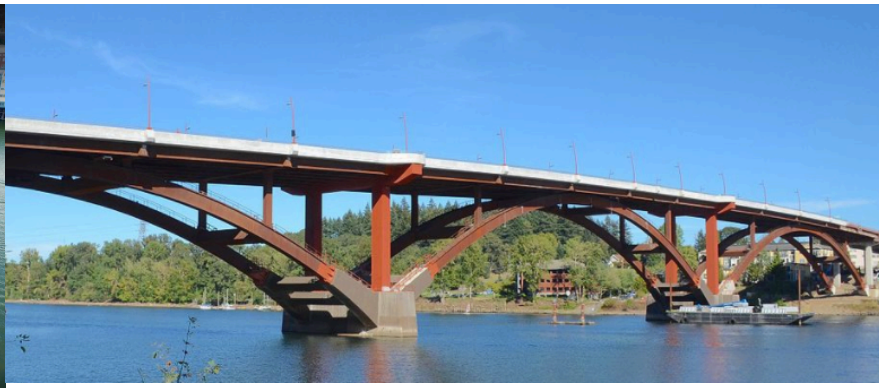

Saint John's Bridge

Tilikum Crossing

Broadway Bridge

Sellwood Bridge

Freemont Bridge

Marquam Bridge

For this project you will build a model of a bridge. You may use any type of materials, but the size will be limited to a bridge that can fit on your desk. It is fine to get help from family members. Look up some ideas on the Internet, and be creative with your design and materials. Most of all HAVE FUN!

Write up a little blurb about your bridge design. It can be realistic fiction written like a Wikipedia article. For example you might build a model of a troll bridge, or you could make a scale model of a Portland bridge. Draw bridges would be fine too.

Due Date: WEDNESDAY, JANUARY 3rd
