

If you thought up until now multiplication wasn't so rough, it's time to learn the really good stuff! For some of you this is review, and for others it's totally new.

Example:

1st: Times the ones... $3 \times 6 = 18$

2nd: Put down the ones carry the tens.

3rd: Times the tens $3 \times 2 = 6$ and add the one you carried $6 + \text{one more} = 7$

So the answer is 78!!!! Way to go!

Now you try
Tens ones
35
x4
