

1. $500,000 \div 50,000 = 10$
because $50 \div 5 = 10$ and
 ~~$500,000 \div 50,000$~~

Solve the equations using the same rule.

$900,000 \div 90,000 = \underline{\hspace{2cm}}$

$700,000 \div 70,000 = \underline{\hspace{2cm}}$

Look closely:

$400,000 \div 400,000 = \underline{\hspace{2cm}}$

2. Use the line plot below to answer the question.

Length of Ribbon in Inches

How many pieces of ribbon were 3 inches or longer?

3.

$7 \overline{)868}$

4. Edward has 342 marbles in bags. If 9 marbles are in each bag, how many bags does Edward have? How many bags will he have if he gives 15 bags to his brother?

5. Henry has a number of donuts in a box represented by the letter d . He took d and shared them in 3 different groups with 4 in each group. Write an equation to solve for d .

6.

$\frac{4}{10} = \frac{\square}{100}$

7. Compare the two decimals using $<$, $=$, $>$

0.57 0.75

0.8 0.80

0.32 0.30

8.

23×10

9. Add the fractions.

$\frac{8}{10} + \frac{2}{10}$

10. If the fraction $\frac{34}{100}$ equals 0.34, then $\frac{72}{100}$ equals

11. Shade in the fraction below to show $2 \times \frac{1}{4}$.

12. $7,000 \div 700 =$

*Bonus: Reduce the fraction.

13. What is the value of angle x ?

14. Start at 10. Create a pattern that multiplies each number by 3. Stop when you have 5 numbers.

15. Draw the line of symmetry on the watermelon.

16.

If $\frac{4}{10} + \frac{5}{100} = \frac{45}{100}$,

then $\frac{7}{10} + \frac{8}{100} = \frac{\square}{100}$.
