A mixed number is a whole number and a fraction together. Example is below.
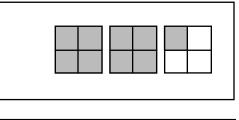

$4\frac{1}{2}$

$\frac{9}{2}$ **Example**
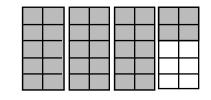

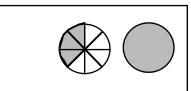

$6\frac{3}{4}$

Write the mixed number next to the picture. Also write <u>the improper fraction.</u>

Given the Mixed Number, draw a picture like above, and show the improper fraction too

$6\frac{1}{2}$	$3\frac{1}{3}$	$8\frac{1}{4}$
$2\frac{2}{6}$	$7\frac{3}{8}$	$5\frac{3}{4}$
